LyricsManager

Imagine you are at a karaoke bar or a party with lots of people singing and dancing to the words of a song. Now, you would like to have the lyrics of that song printed out on a piece of paper for your memory. This would be like having the lyrics of a song on your phone. But, this is not enough for your desire to know the lyrics. After all, you are a fan of the song. You want to know the entire lyrics of that song, including the artist's name, which part of the song is playing, how long it will last. You want to know the duration of the song before you have to leave. This is where LyricsManager becomes handy. It is a modern software, with an easy to use GUI. With LyricsManager you can get just about everything about a song that you might need. You can print the lyrics of the song with the artist's name, song title and the artist. You can also download the lyrics of the song so that you can listen it offline in your phone and on the way to the party or to the karaoke bar. You can also download the lyrics of the song into your favorite text editor. It is possible that your favorite song is not available on the internet, but that you can still get the lyrics in your favorite text editor. LyricsManager is versatile software and it can handle most of the popular formats for song lyrics. With LyricsManager it is not necessary to know the format of the song you are looking for.
